- **What is Thread lifting?**
a procedure for lifting the skin using thread
- **Principle of Thread Lifting**
The Thread itself has a cog, which physically pulls tissue directly, and as the Thread melts, collagen is produced around it, resulting in elasticity

10 mono Thread

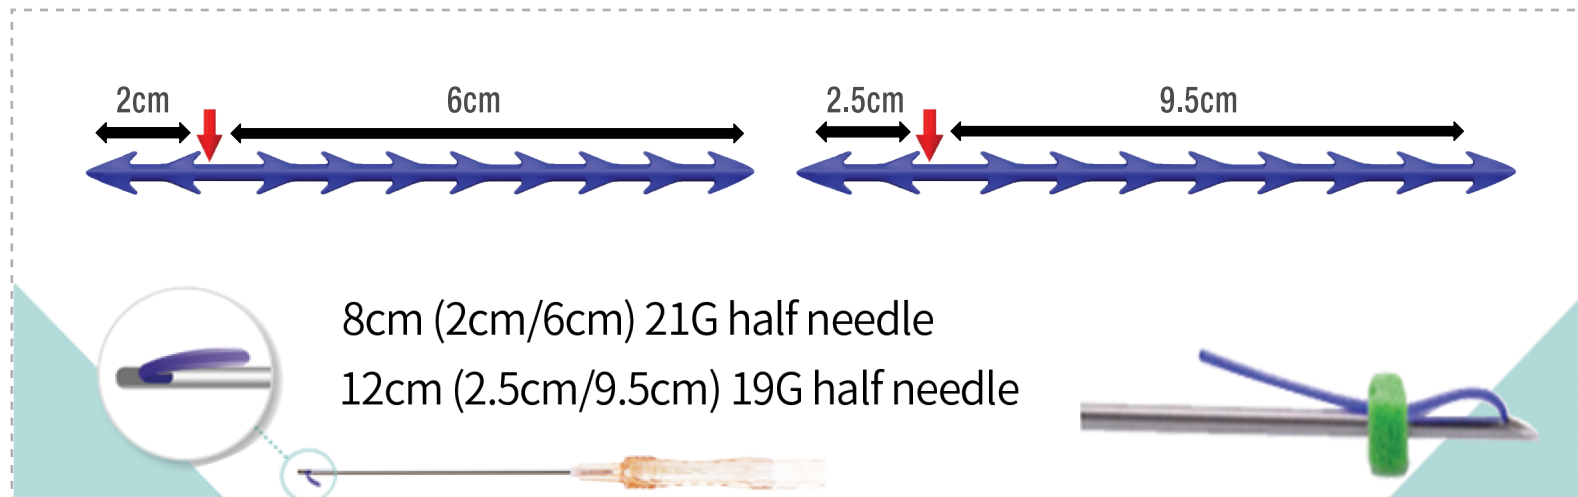

Ingredient	Needle Length	Thread Length	USP	Package
Type	120mm	190mm	1-0	10ea
Component	80mm	150mm	2-0	10ea

10 cog Thread

Needle Size (Gauge)	Needle Length	Thread Length	USP	Package
29g	25mm	40mm	6-0	20ea
29g	38mm	50mm	6-0	20ea
26g	60mm	90mm	5-0	20ea

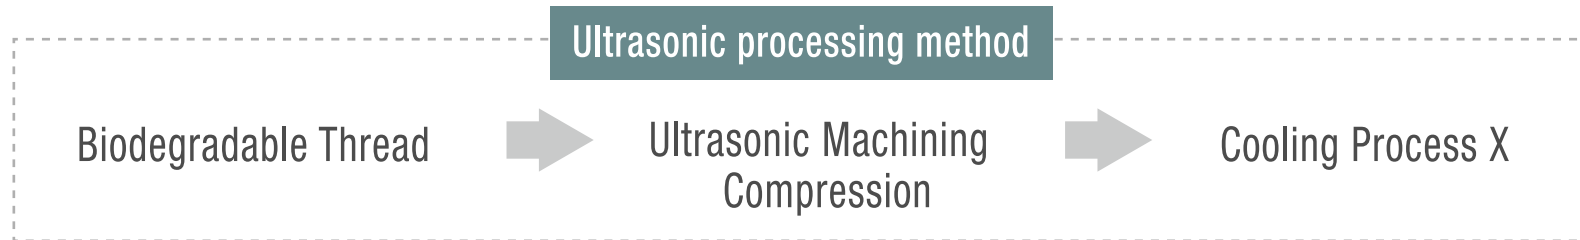

1) Easy procedure

Due to the manufacture of ultrasonic molding method, the thread is strong, so even if it is asymmetric, it maintains the pulling force of the tissue. Easy procedure to insert the needle in the direction of lifting from the chair position

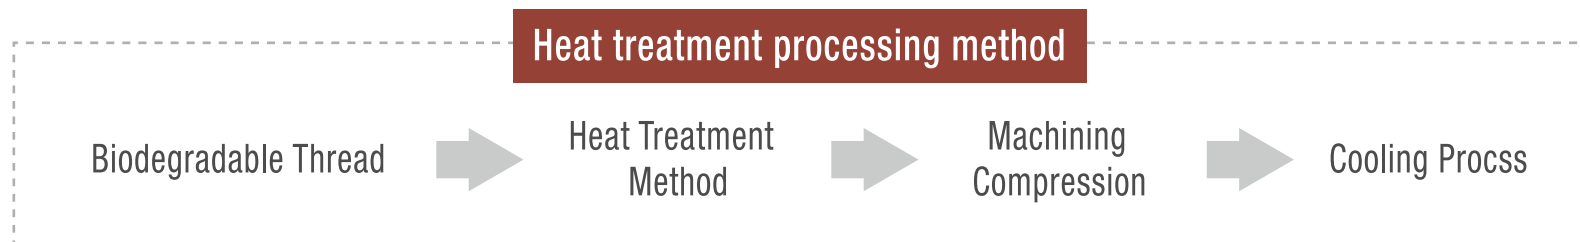

2) Manufactured by ultrasonic processing

Overcoming the disadvantages of heat treatment with 3D compression using ultrasonic molds. No thermal toxicity by ultrasonic method other than normal heat treatment

VS

10 cog x 10 mono

Thread Thread
